Date: Friday, March 30, 2012 2:27:33 PM

Hello Sean,

I spoke with Rob and gave him details about the two areas (Burton and Dockton) we want to survey. He will check both of your schedules to arrange a time when I can come meet with you or we can conference call. I'm forwarding links to two of the PDF maps I've posted for Quartermaster Harbor. These depict the locations of mooring buoys and estimated watch circles based on bathymetry and 2.5 / 1 scope. The double circles represent the length of vessels attached to buoys.

Burton (roughly 12 acres): http://www.dnr.wa.gov/Publications/aqr_qtrtmharbor_map_pg1.pdf
Dockton (roughly 32 acres): http://www.dnr.wa.gov/Publications/aqr_qtrtmharbor_pg5.pdf

Thank you and I hope we can work together on this effort!

Lisa M. Randlette

Hello Lisa, I think we may have time to work this in, especially as it relates to potential releases of hazardous substances. We may also have the time available for eelgrass mapping potentially--depending on what happens with our summer schedule. Rob Pedersen is taking the lead as the divemaster for now and will be contacting you for more information after we get through a spill evaluation in the Duwamish East Waterway and training dives next week.

Thank you.

Subject: Quartermaster Harbor / Assess Submerged Aquatic Resources and Sources of

Hello Sean,

Mr. Anise Ahmed at the Department of Ecology gave me your contact information. I work for the Department of Natural Resources, Aquatic Resources Division. As manager and trustee for state-owned aquatic lands we have designated Quartermaster Harbor, King County as part of an aquatic reserve around Maury Island. We are currently developing a recreational mooring buoy plan for Quartermaster Harbor in response to an increase of unauthorized buoys in recent years.

I'm contacting you to see if the EPA Region 10 Dive Team may be able to assist us in documenting the sea floor in two areas – Dockton and Burton Cove. We are concerned about anecdotal reports of car batteries, sunken vessels, broken creosote pilings and similar debris in the vicinity of existing, unauthorized mooring buoys. We have also evaluated 30 years' worth of Department of Fish and Wildlife herring spawn surveys that illustrate a substantial decline in eelgrass and other aquatic vegetation. From the list of previous projects on your web site I'm hoping that our project can benefit from your dive team's expertise.

I understand you're out of the office until April 5th. Please contact me at your earliest convenience to discuss whether your team would be interested in participating in our effort. Thank you!
